

FIVE REASONS CYBERSECURITY NEEDS TO TRANSFORM

1. The number of vulnerabilities has exploded.¹

2. And organizations are facing increasingly energized threat actors.²

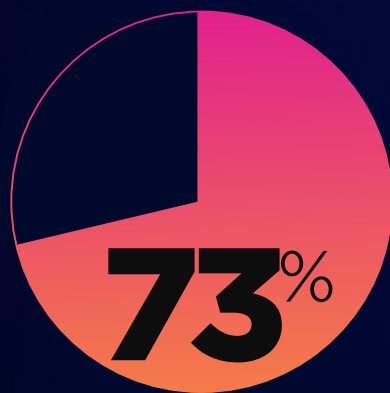

3. Adding complexity, the distributed workforce is here to stay.²

of firms believe at least **one-third** of their employees will still be remote in 18 months.

4. And C-level executives are concerned.²

CONCERNED

remote workers have introduced new risk.

VERY CONFIDENT

in their network visibility.

5. Yet, security professionals are over confident.²

RADICAL CHANGE DEMANDS RADICAL ACTION.

Discover how to secure your distributed workforce and remote operations.
